

## **BSI Becomes Wisconsin's First INSTALL Warranty Contractor**

July 7, 2016 – Congratulations to floor covering contractor James Macejkovic and his team at BSI for becoming the first contractor in Wisconsin to sign as an INSTALL Warranty Contractor with the North Central States Regional Council of Carpenters. BSI saw the value in becoming an INSTALL Warranty Contractor, which establishes a reliable solution for General Contractors and End Users to assure elimination of faulty floorcovering installations.

BSI's floor covering employees recently went through the training process to become INSTALL-certified, which includes being evaluated from blueprints to finished product on more than 100 checkpoints for accuracy. Members of the BSI leadership team have visited the Carpenters International Training Center (ITC) in Las Vegas and have sent their employees to Foreman Training at the ITC, embracing the United Brotherhood of Carpenters' conferences and leadership training opportunities.

“I am excited to partner with BSI to provide their customers with the best trained workforce in the country,” said NCSRCC INSTALL Representative Jeff Miller. “Becoming an INSTALL certified contractor shows the commitment BSI has to professionalism and productivity, and we are thrilled to continue to build this relationship.”
